

Track & Turf Update #2

February 5, 2024

I. Design Work

- MISD Design Committee visited the track and turf sites of four main contractors then initiated foundational track and turf design.
- The Millsap Community Committee reviewed and approved the track and turf designs and provided a recommendation on the center logo of the field.
- The MISD Board of Trustees reviewed and showed full support for the proposed track and turf designs.

II. Design Philosophy

The Millsap ISD teams that provided feedback to the design did this based on some common philosophical beliefs.

- This is a track and football field were designed to join the excitement of today with the traditions of yesterday.
- The track and football field are designed to be reflective of the past, current for today, and sustainable in the future.
- The track and football field represent Millsap ISD as a whole, not just an individual program or selected group.
- The teams were conservative in the design which may allow funding for additional items to enhance the track and football field, such as a new Scoreboard.

III. Final Rendering – I am excited to share the final rendering that the Millsap ISD Design Committee, Millsap Community Facility Committee, and Board of Trustees all support!
